Summary

Highly accomplished and results-driven Test Lead /Test Manager with 15+ years of experience in Quality Assurance, Software Testing, and Test Management, including extensive client-facing (onsite) experience . Proven expertise in leading testing initiatives for large-scale middleware, cloud transformation, and migration programs across enterprise environments. Skilled in defining and executing end-to-end testing strategies covering Functional, SIT,OAT , Test Automation and Performance Testing. Demonstrated success in delivering high-quality solutions within Agile, DevOps, and Waterfall delivery models across the Postal, telecommunications, and Financial Services domains. Experienced in managing complex multi-system test programs, implementing risk-based testing approaches, driving defect management and quality governance, and collaborating with cross-functional stakeholders to ensure successful project delivery within challenging timelines.

Experience

- Capgemini / Client Engagement-Royal mail Group(UK)

Feb 2020 – Present

Test Lead/manager

 - Led and managed testing activities for a critical middleware platform, ensuring quality, stability, and timely delivery for bi-weekly production releases.
 - Oversaw upgrade testing activity for key middleware components including IBM App Connect Enterprise (ACE), IBM MQ, and IBM API Connect (APIC) and ETP tool like Jira,Confluence ,Jenkin etc.
 - Part of migration programs testing activity involving IBM API Connect (APIC) to Azure API Management (APIM), FDS migrations, IBM MQ on Azure implementations, and FMS to Managed File Transfer (MFT) migrations, ensuring seamless integration and business continuity.
- Capgemini / Client Engagement-Royal mail Group(UK)

May 2015 – Jan 2020

Test Lead

 - Played a key role in the FMO Program, validating end-to-end business processes, system integrations, batch processing,

Skills

- Test Management
- API Automation Testing
- Middleware systems Testing
- Test Planning and Estimation
- Functional Testing
- Integration Testing
- End-to-End Testing
- Regression Testing
- Defect management
- SoapUI/ Ready API
- Postman
- JMeter
- JIRA
- Zephyr
- opentext ALM
- ADO board
- Confluence
- MQ RFHUtil
- FileZilla
- WinSCP
- PuTTY
- IBM MQ
- Bitbucket
- Jenkins
- SQL
- java basic
- Knowledge on Gen AI and Agentic AI
- Knowedege on Playwright

Certifications

- Azure Cloud Practitioner
- Product Owner Certification
- CSM Agile Certification

and downstream data flows for route planning and workload assessment transformation initiatives.

- Led testing for multiple Parcel Integration Releases (R1, R2.1, R2.2, R3.1, and R3.2), ensuring successful delivery of large-scale enterprise releases with over 40 interfaces.
- Validated complex middleware integrations across IBM MQ, File Transfers, APIs, and protocol-based communication channels, ensuring data accuracy and reliability.
- Executed testing for the GXS Migration and Skinny BIG Transformation Program, validating transformation logic and integration workflows for 24 interfaces migrated from GXS to IBM Integration Bus (IIB).

- ISTQB Foundation Certification
- Connected Manager Program by Harvard University

• **Capgemini /Client Engagement – Grant Thornton(US)**

May 2013 – Apr 2015

Senior Test Analyst

- Contributed to the testing and quality assurance of Tax Symphony and CEA, enterprise applications for managing and processing financial contracts and business transactions.

• **Capgemini – Client Engagement – KPN(NL)**

Mar 2010 – Apr 2013

Test Analyst

- Performed testing on mainframe and web-based telecom applications including CM Mobile, MCCS, and Keteran.

• **Datacomp Web technologies**

Feb 2007 – Feb 2010

Software Test Engineer

- Conducted testing for Mutual Fund and Insurance Product applications.

Education

- Bachelor of Engineering
