Summary

Highly accomplished and results-oriented Test Manager with 15+ years of overall experience , Middleware technology projects experience in leading comprehensive testing strategies across functional, integration, automation, and performance testing domains. Proven expertise in driving quality assurance for large-scale enterprise programs within Agile and DevOps frameworks, spanning the postal, telecom, and financial services sectors. Adept at managing complex, multi-system test engagements , implementing risk-based testing methodologies, and ensuring high-quality delivery under aggressive timelines through strategic stakeholder communication and end-to-end quality ownership.

Experience

- Capgemini / Client Engagements-Royal mail Group** Feb 2020 - Present
Test Manager
 - BIG Factory Project - Led and managed all testing activities for Weekly 2 releases In BIG Factory Project
- Capgemini / Client Engagements-Royal mail Group** May 2015 - Jan 2020
Test Lead
FMO and Parcel Automation Project - Test Lead role with Middleware and Database testing
- Capgemini /Client Engagement - Grant Thornton** May 2013 - Apr 2015
Senior Test Analyst
Performed test preparation and execution activities
- Capgemini - Client Engagement - KPN** Mar 2010 - Apr 2013
Test Analyst
- Datacomp Web technologies** Feb 2007 - Feb 2010
Software Test Engineer

Projects

Skills

- * Core Competencies- Test Management,API Automation Testing, Middleware systems Testing, Test Planning and Estimation,Functional,Integration,End-to-End,Regression Testing, Defect management,Test Coordinator .
- * Testing Tools-> SoapUI, Postman, ReadyAPI, JMeter
- * Project / Defect Tools-> JIRA, Zephyr, Micro Focus ALM, Azure DevOps, Confluence,
- * Middleware Technology Tools -> MQ RFHUtil, FileZilla, WinSCP, PuTTY
- * Version / Release / CI-CD Tools -> Bitbucket, Jenkins, Git, ADO pipeline
- * Databases / Query Tools -> SQL
- * Programming Languages -> Java (Basic)

Certifications

- Azure Cloud Practitioner
- Product Owner Certification
- CSM Agile Certification
- ISTQB Foundation Certification
- Connected Manager Program by Harvard University

- BIG Factory – Factory model project with every week 2 releases for interfaces and All platform component upgrades and migration activities.
- Final Mile Optimization – Route planning and workload assessment transformations, Validated seamless integration between FMO and Pegasus applications, including batch processing and downstream data flow.
- Parcels Releases R1, R2.1, R2.2, R3.1, R3.2: successful delivery of parcel integration releases involving over 40 interfaces, validating complex middleware data flow across MQ, file transfer, APIs, and protocol-based integrations.
- GXS Migration and Skinny BIG: Tested transformation and integration functionality for 24 interfaces on the GXS platform to IIB .
- Tax Symphony, CEA, KSource: Executed comprehensive system, integration, and regression testing for critical financial projects, ensured data integrity and application functionality.
- CM Mobile, MCCS, Keteran Release: Performed system integration and end-to-end testing for key telecom projects, ensuring application reliability and user satisfaction.

Education

- Bachelor of Engineering
